Model: 58209 CHEMICAL FLOATER

The chemical floater is designed for use with Bromine or Chlorine slow dissolving tablets and measure water temperature at the same time. The large capacity floating chlorinator can be used with 2.5cm(1") or 7.6cm(3") Bromine or Chlorine tablets. An adjustable feed ring controls the chemical distribution into pool. The chemical floater is made of U.V resistant plastic for many seasons of use.

WARNING:

1. Use only one type of Chlorine or Bromine in the Chemical Floater. Fire and/or explosion may result from mixing pool chemicals.
2. All chemical use should follow the chemical suppliers warning and directions.
3. Adjust the feed ring to avoid the chemical into the pool while pool is in use.
4. Keep out of reach of children.

ASSEMBLY

1. Rotate cover to open position. Place tablets inside.
2. Align the arrows on both cover and bottom and insert the cover into the bottom. (Fig.1)
3. Turn clockwise to close the Chemical Floater. (Fig.2)
4. Rotate the adjustable feed ring to the desired flow rate. (Fig.3)
