

 **100%
recyclable
materials**

**The best option when it comes to Corrosion
Resistance and Flexibility.**

The most flexible polybraided hose is featured with a strong corrugated inner tube covered with tightly braided polyester fibers, which can endure the long time bending and keep the original performance of tubing.

KEY BENEFITS

✓ ANTI CORROSION RESISTANCE AND KINK FREE

Extremely flexible

Allows easy connections because of its optimum bending radius

UV resistance

Flexible has the same resistance, before and after UV exposure

Strong corrosion resistance

For a longer lifespan under the harshest conditions

High resistance to chemicals

(Anti-legionella water treatments)

Drinking water quality

Antibacterial

Healthy home!

✓ DRINKING WATER SAFE

Complies with DWD certifications based on WHO (World Health Organisation) guidelines.

KTW-A

BS6920

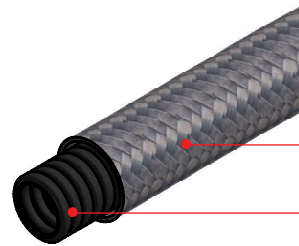

DM174

Metals covered by the DWD (Drinking Water Directive).

The TWIST range incorporates metallic fittings in accordance with the DWD that fixes the limits of impurities accepted in metals in contact with water. It guarantees a safe drinking water quality at the consumer's tap.

Free of harmful chemicals (Phtalenol, parabens and solvents).
