Instructions on how to remove lighting control parts and/or non-lighting parts, if any, or how to switch them off or minimise their power consumption during light source testing  $\frac{1}{2}$ 

|        | Explaination of the step   | Pictures | Tools                                    |
|--------|--|----------|--|
| Step 1 | Remove the lampshade   |          | By hand                                  |
| Step 2 | Use a flat-blade screwdriver to pull the wires out of<br>the connection terminals  |          | By hand                                  |
| Step 3 | Use screwdriver and needle-nose pliers to remove the screws, nuts and nylon washers that fix the light board, and replace a new source light |          | screwdriver and<br>needle-nose<br>pliers |
| Step 4 | Fix the new light source to the chassis together with screws, nuts, nylon spacers, and iron posts  |          | By hand                                  |
| Step 5 | Turn on the lamp   |          | By hand                                  |
| Step 6 |  |          |  |
| Step 7 |  |          |  |
