**Introduction**

Please found the Packing and Packaging Process.  
This file must be completed and compiled by the person who made the Selling Unit.

**Weight Measures Requirements for packaging:**

- To ensure accuracy of measurements, made 5 measures then made the average .
- All packaging elements are weighed without conditioning. *Note: For accuracy measurement, measure in controlled atmosphere. Ref to ISO 187 (50% relative humidity and 23 degree Celsius)*

**Specific informations:**

- This informations filled in this file must be compliant with packaging specifications, ECO-FEES declaration and are able to be controled.

**Certificate for the use of recycled**

If the paper or cardboard used contain more than 50% of recycled AND that is generate an increase of the weight of the packaging compared to his equivalent made by virgin paper and cardboard, I am committed to providing the certificate for the use of recycled provided by ADEO.
